Quality. Quality. Quality.

Our Commitment to the Environment

PLANET GREEN'S COMMITMENT TO THE ENVIRONMENT

Consider these facts:

- More than 300 million printer cartridges end up in our landfills on a yearly basis. That translates into more than \$450 million being thrown away.
- Approximately 90% of printer cartridges are recyclable, but only 20% are being recycled. Excess ink and toner residue can filter into our water supply.
- More than two ounces of oil are used for the production of every inkjet cartridge. That means we're going through more than 4,000,000 gallons of oil for single-use cartridges each year.
- The recovery and reuse of empty printer cartridges diverts millions of cubic feet of material from waste disposal, saving us the millions of tax dollars needed to pay for additional landfill management.

Planet Green recognizes that business has a direct and indirect impact on the environment. Our goal is to achieve sustainability through calculated decisions, measurable results and direct impact. As a remanufacturer, Planet Green provides an answer for people who are looking to purchase recycled products and to keep their cartridges out of landfills. We offer an alternative to the standard end-of-life model for these items by extending their lifecycle and closing the loop on their production. We take this job seriously and extend it to our business philosophy and practices.

Energy Use

Planet Green has taken proactive measures to minimize energy use in its 35,000 square foot facility.

Packaging

An effort to reuse and source packaging material has been made with our Focus brand cartridge packaging, which is made up of over 30% recycled material.

Water Conservation

Water is an integral part of the remanufacturing process, and we have done our part to improve our process and reduce the use of this valuable resource.

Waste

Planet Green is constantly striving to recycle, reuse and reduce its waste throughout the office and warehouse.

Branding

All of our company ventures including websites, boxes, sales brochures & marketing material, even our company name, reflect our continuous environmental commitment.

Regulatory Compliance

Frequent inspections ensure compliance with regulatory codes established by City of Los Angeles Fire and Public Works department.

Planet Green's environmental policy is imbedded in the company's mission. Future generations are relying on our implementation of such simple acts and we feel strongly about your support of aftermarket products. We appreciate your efforts in working with Planet Green today for a greener tomorrow.

PLANET GREEN

20724 Lassen Street
Chatsworth, CA 91311

Quality. Quality. Quality

As President and CEO of Planet Green, I would like to offer my sincerest "Thank you" to our loyal customers. We truly appreciate and value your business. Your continued support throughout the years, attests to my belief that focus on absolute quality and integrity is the foundation to a truly long-lasting relationship.

Since Planet Green's inception over a decade ago, we have worked vigorously to produce a quality product that you, our valued customer, can proudly stand behind. My commitment to absolute quality, has enabled me to build a solid reputation within this industry. The steadfast commitment of our customers over the years, has afforded us the opportunity to produce over 200,000 cartridges per month, all in the United States, with the utmost standards of quality securely intact.

Of course, none of this would have been possible without the hard work, dedication and passion of the Planet Green team. Each member of our staff has embraced the philosophy of "Quality. Quality. Quality." and incorporated this credo into each and every action they undertake. I am very lucky to be working side-by-side with such extraordinary individuals, without whom I would not be where I am today.

It is my personal and professional goal to ensure that Planet Green becomes the source you demand, trust and love; for quality remanufactured inkjet cartridges for many more years to come. Planet Green is here to work harder for you than ever, because each individual within our organization realizes that without our valued customers, there would be no Planet Green.

Thank you for the confidence you have placed in us. We will do everything possible to continue to earn your trust and business.

Sincerely,

Sean Levi
Founder / CEO
